

AT6400 AllTouch IR Universal **Remote Control**

User Guide

Welcome to the Ultimate Control Experience

Your new AT6400 AllTouch® Infrared (IR) Universal Remote Control (remote) is a true universal remote, functioning as four remotes in one. As one example, you can use this remote to operate your set-top, your TV, and two other devices, such as a DVD player and VCR

Important Information **About Your Remote**

Your remote is initially programmed to only operate your set-ton. Therefore, you must program the remote to operate your TV, VCR, or other devices. See Program the Remote to Control Mv Devices to learn how to enter device codes and program your remote

Note: You must use the IR remote within line of sight of the set-top to operate the set-top

How Does A Universal Remote Control Work?

You tell the remote which type of device you want to operate using the four keys arched across the top of the remote. These keys, known as mode keys, are labeled STB, TV, DVD, and AUX Each mode key is associated with a specific device. As an example, after programming the remote, if you want the remote to operate your TV, you simply press the TV key. Other keys you press on the remote, thereafter, should operate your TV. Want to switch the remote to operate a different device? Just press the mode key for the next device you want to operate. In this guide, you will learn which types of devices you can control and how to program the remote to control your specific devices.

Where Do I Start?

Before you begin using your remote, complete the

Install the Batteries

The remote requires two AA batteries (alkaline recommended). A diagram in the battery compartment of the remote indicates proper placement of the batteries. When batteries are properly installed, the light on the remote blinks each time a key is pressed.

Visit the Quick Reference Section

Use the Quick Reference section of this guide to familiarize yourself with the remote and the functions of its various keys. Knowing the function and location of the keys on the remote will assist you when you are programming the remote.

Program the Remote

To learn how to program your remote, refer to the sections What Devices Can I Control What Devices Do I Want to Control, and Program the Remote to Control My Devices for further instructions

Find a Place to Store Your Remote

Keeping up with one remote is much easier than keeping up with four or five remotes. However, it is still a good idea to find a storage location for your remote. The AT6400 is not a toy. It should be kept out of the reach of children under the age of 6 years.

Program the Remote to **Control My Devices**

Your remote is initially programmed to only operate your set-top. You will need to set up the remote to operate your other devices using its TV_DVD_and AUX modes. The TV key may be programmed to operate a standard or high-definition television (HDTV). The DVD key may be programmed to operate a DVD player. The AUX key may be programmed to operate a VCR, a receiver, an amplifier, or a Home Theater in a Box (HTIB) system. If the remote provides only limited functionality for a device, you can look for a code that provides more functionality.

Quick Reference

Refer to the code tables at the end of this guide to locate additional programming codes.

Note: You have the option to assign some remote keys to operate one device type only. For example you may want to assign volume control to the TV only. If this is the case, you can reprogram power, volume, and channel control using procedures found later in

Assigning a Device Code to a Mode Key

1. Refer to the code tables at the end of this guide to locate the information for the device you want to program.

Note: If your device is not listed, you may be able to program the remote using the Auto-Search function. Go to What If None of the Codes Work for instructions

- 2. Turn on the device that you want to assign to a mode key.
- 3. Press and hold the appropriate mode key (TV, DVD, or AUX) on the remote, and then press and hold the OK key.
- 4. Release both keys and the mode keys blink twice.
- 5. Enter the first 4-digit setup code for the device using the numeric keys (0-9) on the remote. The mode key blinks three times to indicate that the code entry was accepted.

Notes:

- · When an invalid code is entered, the selected mode key displays a long flash to indicate that you have not entered the code correctly.
- · Should the remote time-out before you complete the code setup, you must start over. This is indicated by one long flash of the red LED.
- 6. Point the remote at the device, and press POWER to test the device.
- 7. Did the device power off?

- · If yes, write this code number in the table found in this guide. You may need it again if the device code is accidentally erased.
- If no, repeat this procedure from step 3 using a different setup code

Note: If none of the codes listed for your brand of device operate the device correctly, go to What If None of the Codes Work for instructions.

8. Repeat this procedure for each mode key you want to program

What If None of the Codes Work?

If none of the codes listed for your brand of device operate the device correctly, or if your device is not listed in the codes table, you can use the Auto-Search function to search through the code library for a valid code. This section provides procedures for using the Auto-Search function to search the code library for TV. DVD and AUX mode codes.

Note: Read the procedures in this section thoroughly before beginning. You need to be prepared to observe the behavior of the remote.

Auto-Search Features

Consider the following items when using Auto-

- · The Auto-Search function begins searching from the first code.
- · If a valid code is not found, the green backlight blinks twice and the remote returns to normal operation.
- If any other key is pressed except PLAY ENTER POWER, EXIT, REW, FF, or numeric keys 1 through 4 (when programming the AUX mode key), the mode key displays a long red flash (error message) and the remote returns to normal operation.
- Should the remote time-out before you complete the Auto-Search function you must start over. This is indicated by one long flash of the red LED.
- If the device is not listed and the Auto-Search function is unable to find a usable code, you may need to use the original remote provided with the device.

Auto-Searching the Code Library for TV or DVD Mode Codes (Program Code 922)

Note: This procedure only applies to TVs and DVDs.

- 1. Turn on the device you that you want to assign to the TV or DVD key.
- 2. Point the remote at the device
- 3. Press and while holding a selected mode key (TV or DVD), press the OK key. For example, to search for a TV code, press and hold TV and OK at the same
- 4. Release both keys and all the mode keys blink

5. Enter the programming code 9 2 2 by pressing the numeric keys on the remote. The mode key you selected in step 3 blinks twice to indicate a successful entry

- 6. Point the remote toward the device, and press
- 7. Your device powers off when it finds the correct code. Then, choose one of the following options:
- · Save code and exit Press the ENTER key on the remote to program the code in the remote and the mode key flashes three times indicating successful entry.
- Step forward Press the fast-forward (FF) key on the remote to step ahead through the codes one at a time. Then, return to step 6.
- Step backward Press the rewind (REW) key or the remote to step back through the codes one at a time. Then, return to step 6.
- · Exit without saving the code Press the EXIT key on the remote. The selected mode key flashes three times and returns to normal operation
- Send the current code Press the POWER key on the remote to send the current code. If the device turns back on, press the ENTER key. If the device does not turn on, return to step 6
- Continue with auto-search function Press the PLAY key on the remote to continue with the autosearch function. Then, return to step 6.

Auto-Searching the Code Library for **AUX Mode Codes (Program Code 922)**

- 1. Turn on the device that you want to assign to the AUX kev.
- 2. Point the remote at the device
- 3. Press and while holding the AUX key, press the OK
- 4. Release both the AUX key and the OK key and all the mode keys blink twice
- 5. Enter the programming code 9 2 2 by pressing the numeric keys on the remote. The AUX key blinks twice indicating a successful entry.
- 6. Press the PLAY key, choose one of the following device categories and then, using the number keys on the remote, press its assigned number (1-4)based on the following list:

1 = VCRs 2 = Receiver/Tuners 4 = HTIB 3 = Amplifiers

Note: The device categories are number-coded to provide a more direct programming method

7. Point the remote toward the device, and press PI AY

- 8. Your device powers off when it finds the correct code. Then, choose one of the following options:
- · Save code and exit Press the ENTER key on the remote to program the code in the remote and the mode key flashes three times indicating successful entry.
- Step forward Press the fast-forward (FF) key on the remote to step ahead through the codes one at a time. Then, return to step 7.
- Step backward Press the rewind (REW) key on the remote to step back through the codes one at a time. Then, return to step 7 Exit without saving the code - Press the EXIT
- key on the remote. The selected mode key flashes three times and returns to normal operation. · Send the current code - Press the POWER key
- on the remote to send the current code. If the device turns back on, press the ENTER key. If the device does not turn on, return to step 7.
- Continue with auto-search function Press the PLAY key on the remote to continue with the autosearch function. Then, return to step 7

Reassign Mode Keys

You can reassign a mode key to operate a different device. For example, you can reassign the AUX key to operate a DVD player or a TV. If you reassign a key, be sure you update the table found in this guide.

Reassigning Mode Keys (Program Code 944)

- 1. Press and hold the STB mode key on the remote.
- 2. Without releasing the STB key, press and hold the
- 3. Release both the keys and all mode keys flash
- 4. Enter the programming code 9 4 4 by pressing the numeric keys on the remote. The STB mode key blinks twice indicating a successful entry.
- 5. Press and release the mode key associated with the type of device you want to control, and then press and release the mode key that you want to change. The newly assigned mode key blinks one time indicating a successful entry.

Some common examples

- To program the AUX key to operate your DVD player, press DVD and then AUX.
- · To program the DVD key to operate your TV, press TV and then DVD.

Change Volume Control

By default, once the TV mode key is programmed with a valid code, the volume and mute buttons control your TV. These keys adjust the volume of your TV higher, lower, or temporarily switch the volume off (Mute), regardless of whether the remote is in STB, TV, DVD, or AUX mode

If you prefer, you can choose to have the volume and mute buttons always control a different device rather than your TV, such as a home theater receiver. (See Controlling Volume for One Device below.) Note that you must first program one of the mode keys, such as AUX, with a valid code for that device.

Alternatively, you can choose to have the volume and mute buttons control different devices when the remote is in different modes. For example, you might want to control the volume on your TV when in TV mode, but the volume on your home theater receiver when in AUX mode. (See Controlling Volume for Different Devices below.) Note that not all devices have volume controls, so if you choose this option, the volume and mute buttons may do nothing in some modes, such as STB and DVD.

Controlling Volume for One Device (Program Code 955)

- 1. Press and hold the STB mode key on the remote.
- 2. Without releasing the STB key, press and hold the 3. Release both keys and all mode keys blink twice.
- 4. Enter the programming code 9 5 5 by pressing the number kevs on the remote. The STB mode kev
- blinks twice indicating a successful entry. 5. Press and release the mode key for the device you want the volume keys to control. For example, if you want to control volume through your TV, press and release TV. The selected mode key blinks three

The volume keys now control only one device whether you are in STB, TV, DVD, or AUX mode.

Controlling Volume for Different Devices (Program Code 955)

times to indicate a successful entry.

- 1. Complete steps 1 through 4 of the Controlling Volume for One Device procedure.
- 2. Press and release the Enter key. The STB mode key blinks three times to indicate a successful entry After you press the Enter key, the volume keys control the device assigned to that mode. For example, in TV mode, the volume keys control volume for the TV only.

- · If any other key is pressed except the Mode keys and the ENTER key, the remote does not accept any changes or updates. The STB mode key displays a long red flash and the remote returns to normal operation
- If the remote times out before you complete programming volume control, the remote does not accept any changes. You must start over from step

Change Channel Control The remote is set by default to control channel

selection on the set-top. You can also prograr channel control to control any of the TV_DVD_or AUX mode devices provided the device allows for channel control assignment. Or, you can set the channel selection control programming to control channels (or page up or down) for all of the devices programmed in the four mode keys. Otherwise, you can only control channels (or page up or down) on a specific device, for example, the TV or DVD Note: The channel control keys include CH/Page,

Jump, and the numeric keys 0 through 9

Controlling Channels for One Device (Program Code 966)

- 1. Press and hold the STB mode key on the remote. 2. Without releasing the STB key, press and hold the OK key.
- 3. Release both kevs and all mode kevs blink twice
- 4. Enter the programming code 9 6 6 by pressing the numeric keys on the remote. The STB mode key blinks twice to indicate a successful entry.
- 5. Press and release the mode key for the device you want the channel key to control. For example, if you want to control channels on your TV, press and release TV. The selected mode key blinks three times to indicate a successful entry.

Controlling Channels for Different Devices (Program Code 966)

1. Complete steps 1 through 4 of the Controlling Channels for One Device procedure.

The channel key now always controls the device

associated with the mode you selected in this procedure, whether in STB, TV, DVD, or AUX mode.

2. Press and release the Enter key. The STB mode key blinks three times to indicate a successfu

controls the device associated with the mode key you select. For example, in TV mode, the channel key controls the TV, but in STB mode, the channel key controls the set-top.

- and the ENTER key, the remote does not accept any changes or updates. The STB mode key displays a long red flash and the remote returns to
- programming channel selection control, the remote does not accept any changes. You must start over from step 1 of this procedure.

Change Power Control

control the power switch on one device at a time, in either mode (STB, TV, DVD, or AUX). When in STB mode the remote switches the set-ton from OFF (standby mode) to ON, or from ON to OFF (standby mode). However, you can alternatively program the POWER key to control the power switch on up to four devices at the same time, instead of controlling one device at a time. It is highly recommended that you set up the POWER key to turn on and off your set-top and your TV at the same time. Turning off the set-top saves electricity and extends the life of the box. When turned off, the set-top can still record scheduled programs on its DVR and perform any other necessary functions.

Controlling Power for Multiple

- 2. Without releasing the STB key, press and hold the
- blinks twice to indicate a successful entry. 5. For the first device, press the STB key. The STB mode key blinks twice.
- key (TV, DVD, or AUX). The selected mode key blinks twice
- four devices). 8. Press the ENTER key to complete the power switch

Example: In an example scenario where you press only TV in steps 6 and 7, the POWER key controls both the set-top and the TV at the same time regardless of which mode the remote is in (STB, TV.

Controlling Power for One Device

- Power for Multiple Devices at Once procedure
- control programming. The last selected mode key blinks 3 times to indicate a successful entry. After you select a mode, the POWER key controls the

device assigned to that mode. For example, in TV mode, the remote controls power for the TV only. Notes:

- and the ENTER key, the remote does not accept any changes or updates. The STB mode key displays a long red flash and the remote returns to normal operation.
- step 1 of this procedure

After you press the Enter key, the channel key now

Devices at Once (Program Code 977)

- 1. Press and hold the STB mode key on the remote.
- 3. Release both keys and all mode keys blink twice. 4. Enter the programming code 9 7 7 by pressing the
- numeric keys on the remote. The STB mode key
- 6. For the second device, press the applicable mode
- 7. Repeat step 6 for up to two more devices (total of
- control programming. The last selected mode key blinks 3 times to indicate a successful entry.

at a Time (Program Code 977)

1. Complete steps 1 through 4 of the Controlling

Press the ENTER key to complete the power switch

· If any other key is pressed except the Mode keys

If the remote times out before you complete programming power switch control, the remote does

not accept any changes. You must start over from

TV mode key is programmed with a valid code.

I FD Indicators

There are red LEDs underneath each of the four mode keys (STB, TV, DVD, and AUX) that flash each time a key is pressed to show which device the key is currently controlling.

There are also green LEDs that illuminate severa keys whenever the remote is in use. They stay illuminated for a short time after a key is pressed

During programming, if the remote times out before you complete the code setup, you will need to start over. This is indicated by one long flash of the red

What Devices Do I Want to Control?

To help you keep track of the devices you want to control. list the type of devices you have (including brand) in the following table. Then, use the code tables at the end of this guide to locate the codes for your device. For example, look under TV Group if you need to program the remote to operate your TV. If you have two devices that use the same key, you must reassign the TV. DVD. or the AUX key. The STB key cannot be reassigned. Go to Reassign Mode Keys. Otherwise, go to Program the Remote to Control My Devices for additional instructions.

Put It Back the Way I Got It

You can return all advanced functions back to their original settings by resetting the remote to factory default settings. Resetting the remote to factory default settings removes all of the programming you have entered for the remote. You must reprogram the remote to restore your original settings.

Resetting the Remote to Factory **Default Settings (Program Code 900)**

- 1. Press and hold the **STB** mode key on the remote. 2. Without releasing the STB key, press and hold the
- OK key.
- 3. Release both keys and all mode keys blink twice.
- 4. Enter the programming code 9 0 0 by pressing the numeric keys on the remote. The STB mode key blinks four times to indicate you have successfully reset the remote to factory default settings.

Notes:

- · If any other key is pressed except the numeric keys, the remote does not accept any changes or updates. The STB mode key displays a long red flash and the remote returns to normal operation.
- · If the remote times out before you complete the factory default reset procedure, the remote does not accept any changes. You must start over from step 1 of this procedure.

Troubleshooting

If there is no response when you press the keys on the remote, please check the following items before calling for service.

Check the Batteries

- · Are the batteries inserted correctly?
- Check the battery condition for leakage.
- · Replace with new alkaline batteries.

Check the Device

- · Is the device's power cord connected to the power outlet?
- · Is the device switched on?

Check the IR Database Codes List

Is the device brand name for the device listed in the

- · If yes and there is more than one code listed, try using a different code to provide more functionality.
- If no, try the following: - Use the Auto-Search function to find a usable code.
- If the Auto-Search function is unable to find a usable code, you may need to use the original remote provided with the device.

Code Tables

If the remote does not recognize your device, you can find codes for your device by brand name. Code tables in this section are organized by the devices assigned to each mode (TV, DVD, and AUX).

FCC Compliance

United States FCC Compliance

This device has been lested and found to comply with the limits for a class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against such interference in a residential installation. This equipment generates, uses, and can radiate radio frequency energy. If not installed and used in accordance with the instructions, it may cause harmful interference to radio communications. However, there is no guarantee that interference will not cour in a particular installation. This equipment does cause harmful interference or radio communications, thowever, there is no guarantee that interference will not cour in a particular installation. This equipment does cause harmful interference or radio or an approximation in the properties of the course of the following measures:

- Recriered or relocate the receiving antenna, if applicable.

- Increase the separation between the equipment and receiver.
 Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
 Consult the cable company or an experienced radiotelevision technician for help

help.

Any changes or modifications not expressly approved by Scientific-Atlanta, Inc., could void the user's authority to operate the equipment. The information shown in the FCC Declaration of Conformity paragraph below is a requirement of the FCC and is intended to supply you with information regarding the FCC approach of this device. The phone numbers isled are for FCC-related questions only and not intended for questions regarding the connection or operation for this device. Please contact your cash essence provider for any questions you may have regarding the operation or installation of this device.

FC Declaration of Conformity

This device complies with Part 15 of FCC Rules. Operation is subject to the following two conditions: 1) the device may not cause harmful interference, and 2) the device must accept any interference received, including interference that may cause undesired operation.

AllTouch IR Universal Remote Control Scientific-Atlanta, Inc. 5030 Sugarloaf Parkway Lawrenceville, Georgia 30044 USA Telephone: 770-236-1077

Canada EMI Regulation

This Class B digital apparatus complies with Canadian ICES-003.
Cet appareil numérique de la class B est conforme à la norme NMB-003 du Canada. 20060628 FCC Standard
